

Financial Ledger Sheet

A one-page operational registration of money in the same observational mode as the field formats. Connect source, recipient, legal classification, stream, purpose, evidence, and lived effect. Report 06 companion · Format 5 v1.0 · July 2026.

Place / node: _____ Period: _____

Base currency: _____ Sheet reviewed by: _____

Per transaction: Record amount and currency/FX, source category, recipient, legal classification, stream, purpose, method/evidence, observed effect, and any privacy or review note.

Rule: Use the classification supported by the underlying record. Do not guess; mark *other* and log a question. Formal accounting remains separate.

☐ Stream A — Land and Ecology ☐ Stream B — Steward Viability ☐ Stream C — Governance and Collaboration

Important rule

The streams are non-compensatory. A strong reading in one stream does not justify weakness in another.

Stream A records Land and Ecology flows.
Stream B records Steward Viability flows.
Stream C records Governance and Collaboration flows.

Consent and care

Reference the receipt or evidence where available. Where photographs, names, schools, or minors are involved, note privacy or consent. Consent is ongoing and revisable.

If a transfer crosses an internal threshold, record the reviewed-by identifier and ensure dual review. If anything is unclear, log it as a question rather than as a fact.

Remember: Connect source to recipient, purpose, evidence, and lived effect. One line per transaction. Honest gaps are more useful than fabricated entries.
