Governance / Decision Log

One decision-memory record for a decision, role change, exception, revision, pause or stop that should remain traceable. One decision per sheet allows mandate, evidence, dissent and correction to remain legible. Format 4 v1.3.2 · 18 October 2026 · Candidate tool.

Place / relation: **Date / version:**

Record held by: **Decision holder:**

Record while the decision is still correctable. Preserve the basis, limits and important disagreement—not only the conclusion.

Authority: AI may assist inquiry or drafting; it cannot hold mandate, consent, judgement or consequence.

The decision, change, pause or stop

Effective from:

Purpose and reason

Basis: observation, experience, evidence, sources

What remains uncertain / competing explanation

Alternatives considered or not chosen

Decision authority, limits / conflicts of interest

Who or what is affected?

Consulted / consented / privacy boundary

Absent, dissenting or unable to participate

Material AI or other tool contribution, if any What did it help retrieve, compare, draft or test? What was checked by a human?

Conditions / responsibilities

Return recipient / date or review point

Revise / pause / stop trigger

Conditions affected: ☐ Land / Life ☐ Steward Viability ☐ Governance / Commons Keep their consequences separate.

Separate money, purpose and decision-making. A later outcome does not rewrite the original basis: add a dated return or a new version. This form records responsibility; it does not create mandate or validate the decision.
