Steward Review Dashboard Sheet

PG Ledger Format 1 · a lightweight review for locally agreed stewardship practice. Cadence may change with season, condition, capacity or purpose.
Report 04 companion · Format 1 v1.4.1 · 17 October 2026 · Candidate tool.

Place / node: _____ **Date:** _____
Review period: _____ **Reviewed by:** _____

A locally agreed review: purpose, responsibility and rhythm are held by the people using the sheet. Independent use does not imply a relationship with Spiralweb or a promise of support.

Read, do not score: colours are dated human judgements, not properties of reality. Keep evidence, interpretation and uncertainty readable.

A
Land / Life

What is happening in the place, and what supports this reading?

- soil cover and water behaviour
- plant vitality and signs of life
- care that occurred or did not occur
- local and seasonal context

Circle one contextual reading:

GREEN YELLOW
RED UNKNOWN

Observed / heard · interpretation · unknown

B
Steward Viability

Can the people carrying the work continue without being consumed?

- time, energy and basic needs
- role clarity and support
- strain, conflict or overload
- capacity for the chosen rhythm

Circle one contextual reading:

GREEN YELLOW
RED UNKNOWN

Observed / heard · interpretation · unknown

C
Governance / Commons

Are authority, agreements and next steps clear enough to proceed?

- known decisions and responsibilities
- consent, dissent and affected people
- separation of money, purpose and decision
- ability to pause, revise or repair

Circle one contextual reading:

GREEN YELLOW
RED UNKNOWN

Observed / heard · interpretation · unknown

Important rule

Do not force green. **Green** may justify a small next step. **Yellow** calls for adjustment. **Red** calls for protection, pause or repair. **Unknown** means there is not enough basis for a reading; it is distinct from Yellow.

Next bounded period

What will happen next—and what supports it?

Who holds responsibility?

What must not be started yet?

Next review / return

Remember: Keep the three condition readings separate. Record the basis and uncertainty for each reading. Decide only the next bounded period. Existing local practice may fit better.

adjust protect pause
