

Steward Review Dashboard Sheet

Place / node: _____ Date: _____

Review period: _____ Reviewed by: _____

PG Ledger Format 1 · the lightweight operational surface for a Penguin Dashboard reading. For an active field or supported stewardship relationship, one light review each month is the default; cadence may be revised locally. Report 04 companion · Format 1 v1.2 · August 2026 · Candidate tool.

Monthly default when active: Return once each month unless local agreement sets another rhythm for season, field condition, capacity, or purpose.

Read, do not score: Keep all three streams separate; record Green, Yellow, Red, or Unknown, then name only the next bounded action reality justifies.

A Land / Life

Is the place becoming more alive, protected, and stable?

- soil cover and mulch
- water behaviour
- plant vitality
- signs of life
- whether planned care happened

Circle one:

☐ GREEN ☐ YELLOW
☐ RED ☐ UNKNOWN

Short note

B Steward Viability

Can the people carrying the work continue without exhaustion?

- time and energy
- basic needs
- role clarity
- overload or conflict
- ability to sustain the locally chosen rhythm

Circle one:

☐ GREEN ☐ YELLOW
☐ RED ☐ UNKNOWN

Short note

C Governance / Commons

Are roles, agreements, and next steps clear enough to proceed?

- known decisions
- clear responsibilities
- aligned expectations
- separation of money, purpose, and decisions
- whether the next bounded period is decided

Circle one:

☐ GREEN ☐ YELLOW
☐ RED ☐ UNKNOWN

Short note

Important rule

Do not force green. Unknown, yellow, or red is useful honesty.

Green may justify a small next step.

Yellow usually calls for adjustment.

Red calls for protection, pause, or repair.

Unknown means there is not enough evidence to make the reading; it is distinct from Yellow.

Next bounded period

What will happen next?

Who is responsible?

What must not be started yet?

Next review date

Remember: One monthly return is the default when the field is active; the cadence may be revised locally. Record only what happened, keep the streams separate, and decide only the next bounded period.

add mulch

repair water access

pause expansion

plant next bounded area

invite one new person

start next school cycle
