

Governance / Decision Log

A PG Ledger decision-memory record for a field, AnchorPoint, or coordination relation when a decision, role change, exception, or revision point should remain traceable. Log it when it happens; this is not a monthly duty. Format 4 v1.2 · August 2026 · Candidate tool.

Place / node: _____ Period: _____
Held by: _____ Version: _____

Use when a decision should remain traceable. Log it as it is made — not after the fact. Keep entries short and reviewable. **Rule:** Separate money, purpose, and decision-making at all times.

ENTRY 1

Date: _____

Decision or change

Reason

Who was involved

Stream

☐ A — Land / Life

☐ B — Steward Viability

☐ C — Governance / Commons

Next review date

ENTRY 2

Date: _____

Decision or change

Reason

Who was involved

Stream

☐ A — Land / Life

☐ B — Steward Viability

☐ C — Governance / Commons

Next review date

ENTRY 3

Date: _____

Decision or change

Reason

Who was involved

Stream

☐ A — Land / Life

☐ B — Steward Viability

☐ C — Governance / Commons

Next review date

When this three-stream frame is used: Land / Life, Steward Viability, and Governance / Commons remain distinct and non-compensatory. A strong reading in one stream never cancels a warning in another. Record reallocations, role changes, and exceptions as explicit decisions.
